Support:

Help and support can be found at www.ontechgsm.com.

Connect extra units

1   Make the settings on the extra unit according to Users Manual.

2   Connect the extra unit to the power (Ontech Rtelay 9015 to a wall socket, Ontech 9012 Alarm Box to its battery).

3   The unit is shown in Ontech Control.

Connect external temparature sensor

1   Removethe unit from the wall socket and then hold the button to both lights go out.

2   Connect the external temperature sensor in the socket labeled "Temp" on the underside of the unit.

3   Plug the device into the wall outlet. In Ontech Control now displays the temperature of both the internal and the external sensor.

Connect Ontech IR 9016

1   Place Ontech IR 9016 as it is directed towards your heat pump or air conditioner.

2   Plug the connector into the socket on Ontech 9040 GSM marked "IR".

3   In Ontech Control set what kind of brand and model you have.

Connect wired alarms

1   Alarm Sensor connects to the supplied alarm
    cable. A-larm to yellow and red wires and
    B-alarm to the yellow and green wires.

2   Insert the cable on the underside of the On-
    tech GSM 9040.

3   Create the alarm list for who should have the
    alarm in Ontech Control.

4   Activate the alarm in Ontech Control.
